# AKSHITA SACHDEVA

Location: New Delhi | Email: akshitasachdeva46@gmail.com | Portfolio: akshitasachdeva.vercel
GitHub: GitHub/Akshita-2006 | LinkedIn: LinkedIn/akshita-sachdeva | LeetCode: LeetCode/_akshita__s/

## Summary

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, full-stack development, and AI-driven technologies. Experienced in building scalable web applications and machine learning solutions. Passionate about leveraging technology to solve real-world problems and create meaningful impact.

## Education

**Bharati Vidyapeeth's College of Engineering, New Delhi** — **AUG 2024 – PRESENT**
Bachelor of Technology, Computer Science and Engineering — CGPA: 9.63/10

## Work Experience

**AI/ML and Research Intern | ISSA, DRDO, New Delhi** — **JUNE 2026 – JULY 2026**

- Developed scalable Python pipelines to process **75 years (1950–2025)** of IMD NetCDF climate data, automating geospatial extraction and preprocessing for large-scale meteorological datasets.
- Built and optimized **deep learning models** for rainfall forecasting using spatio-temporal features derived from rainfall, temperature, and elevation data for various grid points of Chamoli district in Uttarakhand.
- Automated model training, seasonal evaluation (JJAS), visualization, and comparative performance analysis using chronological validation and standard regression metrics.

**Virtual Internship on AI and Data Analytics | Shell India Pvt Ltd, AICTE** — **JULY 2025 – AUG 2025**

- Developed an EV Adoption Forecasting solution using Python and machine learning to predict future electric vehicle adoption trends from historical datasets. | **GitHub** | **Live Demo**
- Conducted data preprocessing, outlier detection (IQR), exploratory analysis, and predictive modeling, providing insights for infrastructure planning and sustainable transportation development.

## Projects

**AyushScan | GitHub | Python, Flask, REST APIs, SQLite, Gemini API, OCR**

- Developed a **full-stack healthcare cost analysis platform** enabling medical bill scanning, overpricing detection, and price comparison against the Jan Aushadhi dataset.
- Integrated **OCR-based bill processing, Gemini-powered bill analysis, multilingual AI assistance** (English, Hindi), and PM-JAY (Ayushman Bharat) coverage recommendations.
- Implemented secure authentication, OTP-based password recovery, user dashboards, and location-based hospital discovery using OpenStreetMap APIs.

**ASDPrognosis | GitHub | Live Demo | Python, XGBoost, Streamlit, OpenCV**

- Developed an AI-based **Autism Spectrum Disorder screening system** using AQ-10 questionnaire analysis and XGBoost.
- Performed preprocessing, feature engineering, one-hot encoding, and external test evaluation on adolescent & adult ASD datasets.
- Achieved **96.91% accuracy** and **0.952 F1-score** with an interactive Streamlit deployment for real-time prediction.

## Achievements

- Secured **1st Position in CSE Department** for Academic Excellence (Semester 3) with **SGPA 9.77**.
- Won **1st Position** among **100+ team** in **Prompt-to-Product: Build with Gemini**, pitching *NeuroAdapt AI*, an AI-powered adaptive learning extension.
- Solved **400+ Data Structures and Algorithms problems** across leading competitive programming platforms, strengthening expertise in algorithms, data structures, and optimization techniques.
- Achieved a **LeetCode Contest Rating of 1770.**
- Secured **Rank 1263 among 24,000 participants** in **CodeChef Division 4**, achieving a **Top 5.3% finish** globally.

## Technical Skills

- **Programming Languages:** C/C++, JavaScript, Python, Java, SQL
- **Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend Development:** Node.js, RESTful APIs, Streamlit, Flask
- **Database, Tools & Frameworks:** MySQL, Git, GitHub, Version Control, Vercel, PyTorch, TensorFlow, Scikit-learn
- **Data Science and AI/ML:** NumPy, Pandas, OpenCV, XGBoost, GeoPandas, Plotly, Gemini API, MLP, LSTM, GRU
- **Core CS & Architecture:** Data Structures & Algorithms, OOP, Design Patterns, DBMS, Operating Systems, Computer Networks
